

**Personalized support**  
to help you navigate  
treatment with  
**DUVYZAT® (givinostat)**

# DEDICATED SUPPORT THROUGH ITF ARC

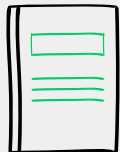

There's a lot to consider when your healthcare provider prescribes a new medicine, and everyone deserves access to the treatment they need, regardless of financial situation or insurance status. The good news is that ITF ARC (Access, Resources, Care) is here to help. ITF ARC offers a variety of support resources to you and your family that make insurance coverage navigation easier, address financial concerns, and help with adherence to therapy.

Here are some of the ways ITF ARC may be able to help you navigate therapy:

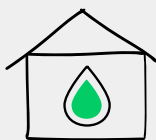

## Insurance navigation

- Insurance coverage benefits verification
- Prior authorization and appeal support, as needed
- Medication deliveries to home or preferred address

## Education and adherence

- Personalized pharmacist support
- Translation services
- Educational materials about how DUVYZAT® (givinostat) may be able to help
- Coordination between families and healthcare providers, including refill reminders
- Patient support group resources

## In-home lab monitoring program\*†

- In-home blood testing with a registered nurse
- Flexible scheduling to fit your family's routine
- Lab reports sent to your healthcare provider to help inform treatment decisions

\*The DUVYZAT In-Home Lab Monitoring Program is only available in each US state and the District of Columbia. Program rules apply.

†For people living in NY, NJ, or RI: State laws require Labcorp to bill your health insurance for the lab tests included in the DUVYZAT In-Home Lab Monitoring Program. You may still be responsible for costs such as co-pays, deductibles, or co-insurance, depending on your insurance plan. Patients without insurance will be billed directly by Labcorp.

To experience the full range of services and support from ITF ARC,  
ask your healthcare provider to help you enroll in the program today.

ITF ARC provides a variety of financial support options for eligible patients:

### Copay Program

With our copay assistance program, you could pay **as little as \$0 per month** in out-of-pocket costs for those with commercial insurance whose health plan covers DUVYZAT® (givinostat).

### Patient Assistance Program

This program provides **medication free of charge to those who are eligible** and do not have insurance, or whose insurance does not cover their prescription.

### Temporary supply programs

Our temporary supply programs help ensure patients have **access to treatment from the start** while waiting for insurance approvals or other processes to be completed. These programs help ensure you or your loved one get medicine without disruption in treatment.

Each patient's eligibility for access programs is evaluated on an individual case-by-case basis. To be eligible, use of DUVYZAT must be consistent with the FDA-approved indication. All programs are designed to comply with state and federal regulations. All programs may be modified or discontinued at any time for any reason, including eligibility criteria, state and federal laws, and program availability.

Restrictions apply. See full restrictions for ITF Therapeutics' Copay Program, Patient Assistance Program, and temporary supply programs at [duvyzat.com/support-and-resources/patient-support](https://duvyzat.com/support-and-resources/patient-support).

**Have questions about ITF ARC or the status of your enrollment?
